

I noticed that I made things very difficult with my coding. I need to find a way to simplify it using var commands. Nothing with mine was very organized and I seemed to try and eyeball it versus trying to find some sort of pattern. I liked the Chat GPT version more because it was more organized and shorter code than what I created. I like the colors they used as well. I have a lot of things to learn with coding still but I definitely need to be more organized.
